Executive Summary

The State Vehicle Report is submitted to the legislature in accordance with UCA 63A-9-402, by the Division of Fleet Operations (DFO). This report contains vehicles defined by UCA 63A-9-101(6) which states:

(a) "Motor vehicle" means a self-propelled vehicle capable of carrying passengers.

(b) "Motor vehicle" includes vehicles used for construction and other non-transportation purposes.

The State Vehicle Report contains a listing of all vehicles currently in an "active" status. The report is generated using data in DFO's fleet management information system, and includes all agencies as defined in UCA 63A-9-101 (1) which states:

(a) "Agency" means each department, commission, board, council, agency, institution, officer, corporation, fund, division, office, committee, authority, laboratory, library, unit, bureau, panel, or other administrative unit of the State.

(b) "Agency" includes the State Board of Education, the Office of Education, each Applied Technology Center, the Board of Regents, the Institutional Councils of each higher education institution, and each higher education institution.

(c) "Agency" includes the legislative and judicial branches.

Utilization Audit of State Fleet Vehicles

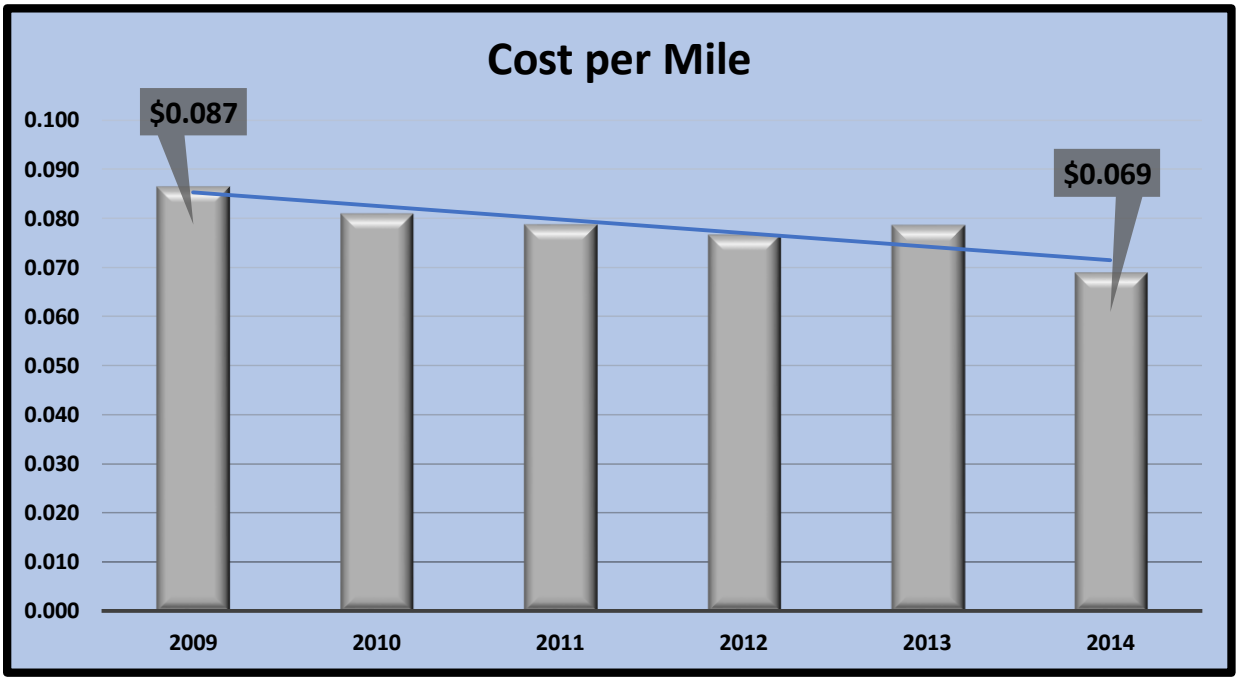
DFO understands that agencies need their vehicles to carry out agency missions. However, vehicles that have not recorded usage for several years or vehicles that record minimal usage vehicles could be pooled or removed from the state fleet to provide a more cost efficient fleet.

DFO has been diligently working with state agencies to help recognize their underutilized vehicles and assisting them in selling those vehicles. Agencies have been cooperative in allowing us to visit and advise them of their non-essential and underutilized vehicles. In FY14 15 under-utilized vehicles were turned in for sale. An additional 59 vehicles were found that were just not needed, and subsequently turned in for sale. In total, FY14 saw a reduction in the State Fleet by 74 vehicles.

Vehicle Services Center (VSC)

The VSC pilot program, which started in FY2011, proved to be a success both in customer service and dollars saved. In January of FY2014 Fleet Operations moved away from our third party maintenance and repair authorization vendor and began authorization in house. The VSC now provides 24 hour/7days a week service to all agencies that lease vehicles from Fleet Operations.

As part of our SUCCESS initiative, the VSC, in terms of cost savings in maintenance and repair, is seeing a reduction in maintenance and repair costs.



Legislative Approved Expansion Vehicles

Each year, with legislative approval, the number of vehicles in the state fleet can increase. These vehicles are defined as a "fleet expansion." The following table shows the vehicles approved by the 2013 Legislature.

Department	Vehicles	Amount
Governor's Office of Economic Development per 2014 HB3 Item 11	2	85,132.16
Transfer to Motor Pool ISF for Veteran's Affairs Nursing Home	3 Busses	257,796.00
Transfer to Motor Pool ISF for Public Safety per 2014 SB 3 Item 24	2	58,907.14
Transfer to Mail Services ISF per SB 3 Item 125	3	65,348.67
Total Amount Approved	**10**	**$467,183.97**

Alternative Fueled Vehicles (AFV) and Advanced Technology (AT) Vehicles

Fleet Operations is a committed partner in the Governor's Clean Air Initiatives. In our part of adhering to and implementing these initiatives we have come up with the following replacement procedures for state agencies leasing from us.

"Class 0604 (compact sedan) and 4910 (full-size cargo van) will be dedicated CNG vehicles. The class 0225 (3/4 ton crew cab 4x4 LB truck) will be a bi-fuel (gasoline/CNG) vehicle. If a CNG will not work for any of these three vehicle replacements, the reason must be stated in the field marked Agency Response to DFO Comments. These comments will be taken to the DAS executive director for review prior to any orders being placed for those replacements and, if necessary, will be discussed with your agency's Executive Director."

AFVs can be classified as vehicles labeled CNG, E85, BiFuel, Electric etc…, basically any vehicle that is or can be propelled by means other than solely gasoline. The Advanced Technology (AT) vehicles are labeled HYBRID, HYBRID Plug-in, etc… and use gasoline much more efficiently through the use of a small internal combustion engine and an energy recovery device that charges on board batteries. These batteries are used for propulsion of the vehicle at various loads through one or more electric motors.

At the end of FY2014 Fleet Operations count of AFVs and Advanced Technology Vehicles was 2,198. In FY 2013 the count at the end of the FY was 1760. This is a gain of 438 vehicles that fall into this classification in FY2014.

AFV and AT Vehicle Definitions

CNG – Compressed Natural Gas

FFV – Flex Fuel Vehicles have an internal combustion engine and are capable of operating on gasoline, E85 (a gasoline-ethanol blend containing 51% to 83% ethanol, depending on geography and season), or a mixture of the two.

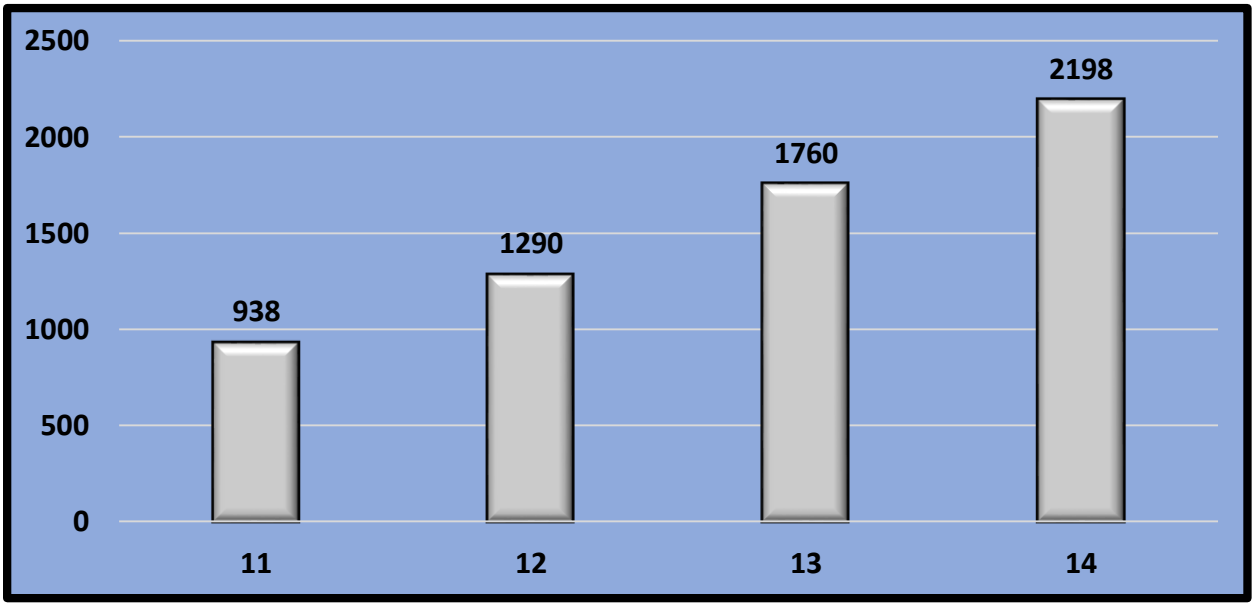
BI-FUEL – Vehicles that have an internal combustion engine capable or operating on either regular unleaded gasoline or CNG. The vehicle contains two different tanks for each fuel.

ELECTRIC - A vehicle that is propelled by one or more electric motors, using electrical energy stored in batteries or another energy storage device.

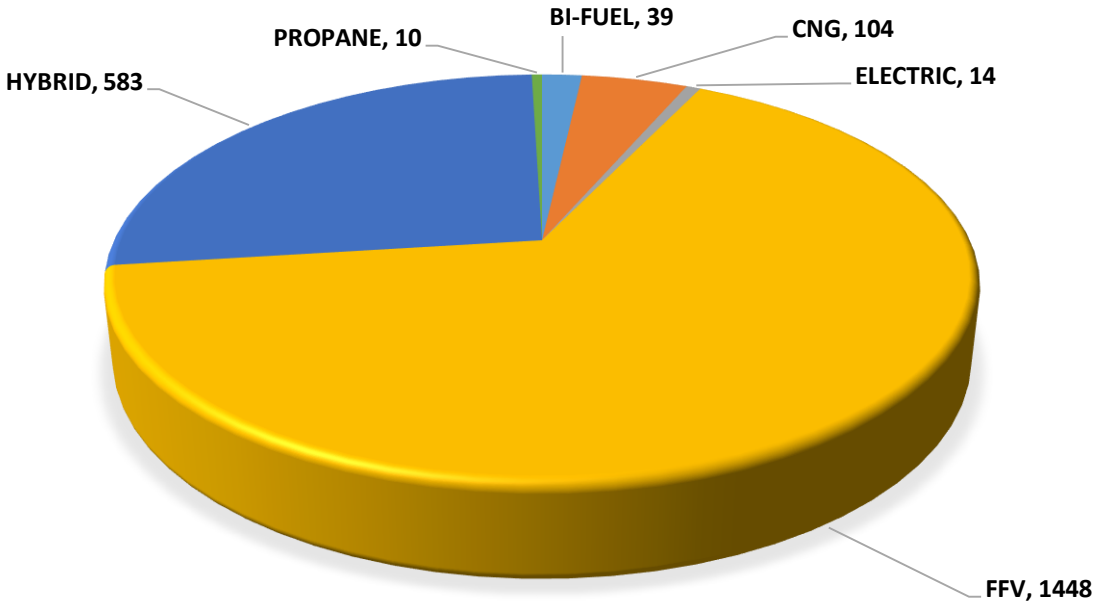
PROPANE – A vehicle that has an internal combustion engine that is capable of operating on propane.

HYBRID – A vehicle that has a traditional internal-combustion engine and a fuel tank, as well as one or more electric motors and a battery pack.

AFV and AT Vehicle Totals by Fiscal Year



FY2014 AFV and AT Vehicles by the Numbers



State Vehicle Count

UCA 63A-9-402 (2) (a) (b) requires the Division of Fleet Operations to submit a State Vehicle Report to the governor and legislative fiscal analyst, on or before November 1 of each year, disclosing the total count of vehicles in the State of Utah fleet.

Vehicles move in and out of the fleet each day as they are replaced or involved in accidents. For this reason the vehicle count can fluctuate daily. With that in mind, the end of October is the best time of the year to take a vehicle count because the fleet is traditionally at its most static point.

Vehicle Totals by Agency

Some agencies maintain and utilize vehicles in an "Active Replaced" (AR) status to supplement seasonal or peak demand periods in agency operations. These vehicles have been replaced by Fleet Operations, and will be sent to the Utah State Agency for Surplus Property (USASP) once the seasonal need has concluded. AR vehicles are included in the vehicle totals for official department counts in the State Vehicle Report. DFO uses the AR status to ensure vehicles are not replaced twice. Examples of agencies with a need of AR vehicles would include but are not limited to: the Department of Natural Resources using vehicles during seasonal park operations, and peak summer construction vehicle demands for UDOT.

The table below shows state vehicle counts in 3 categories (Active Vehicles, Active Already Replaced Vehicles, and Total Vehicles). The Total Vehicle count includes all seasonal AR vehicles.
