State Vehicle Report Explanation and Definitions

Purpose of the State Vehicle Report

The State Vehicle Report is submitted to the Legislature in accordance with UCA 63A-9-402, by the Division of Fleet Operations (DFO). This report contains vehicles defined by UCA 63A-9-101.

(6) (a) "Motor vehicle" means a self-propelled vehicle capable of carrying passengers.
(b) "Motor vehicle" includes vehicles used for construction and other non-transportation purposes.

The State Vehicle Report contains a list of all vehicles that are documented, and currently have an "Active" status. The report is generated by DFO's Fleet Information Tracking System, and includes all agencies as defined in UCA 63A-9-101.

(1) (a) "Agency" means each department, commission, board, council, agency, institution, officer, corporation, fund, division, office, committee, authority, laboratory, library, unit, bureau, panel, or other administrative unit of the State.
(b) "Agency" includes the State Board of Education, the Office of Education, each Applied Technology Center, the Board of Regents, the Institutional Councils of each higher education institution, and each higher education institution.
(c) "Agency" includes the legislative and judicial branches.

Explanation of Vehicle Count

In accordance with UCA 63A-9-402 (2)(a)(b) the Division of Fleet Operations is required to submit a State Vehicle Report on or before November 1 of each year, disclosing the total count of vehicles in the state fleet. Legislative sub-committees throughout the state have allowed 22 expansion vehicles for FY2004. The total vehicle count as of November 1, 2004 is 7296.

The movement of vehicles in and out of the fleet as they are purchased and sold is an on-going process. For this reason the vehicle count can fluctuate from one time period to another. When a vehicle count is compared day-to-day, or month-to-month, the count often varies. A snapshot of the fleet can be easily taken, allowing analysis of all vehicles in the tracking system. With that in mind, the month of October is traditionally the best time of the year to take a vehicle count because the fleet is at its most static point.
