Attachment 22 Sample "Dirty Dozen Report"

To Our Stakeholders, Legislators, Employees, and Customers:

The Division of Fleet Operations (DFO) is pleased to present you with a copy of the Fiscal Year 2000 Annual Report. It contains the mission, goals, objectives, and recent accomplishments of DFO. In addition, various measurements and benchmarks tracked by DFO are provided in the attachments section of the report.

I hope you find the information in this report informative and helpful relating to the state's fleet operations. Our goal is to make this report useful to its intended readers. Should you have a helpful suggestion or comments on how we can improve this report, we want to hear from you.

Sincerely,

Steven W. Saltzgeber
Director
Division of Fleet Operations

Introduction

The Annual Report is a tool of measurement for DFO to evaluate the activities of each of the programs within DFO during the previous Fiscal Year. In addition the Annual Report provides an opportunity to review benchmarks and mission statements, and define objectives for the coming year that will continue to reduce the costs of operating the fleet and increase the service levels for customers of the Division.

Division Description

The Division of Fleet Operations is a customer-based organization charged with fulfilling the transportation, fuel and vehicle maintenance needs of the employees of the State of Utah. DFO also oversees the disposal of State and Federal surplus property. These duties are accomplished through the hard work and innovative ideas from the Division's four major programs that include: the Daily Pool/Shuttle Services Program, the Operations Program, the Fuel Network Program, the Surplus Property Program. All of the above mentioned programs are supported by the Administration, Accounting and Information Technologies (IT) programs of DFO.

The Division of Fleet Operations is presently housed in two locations, Suite 4120 of the State Office Building located on Capitol Hill and 13800 South 435 West in Draper City, near the State Penitentiary. There are also several Mini-Motor Pools, with vehicles designated for daily use, located throughout the State.

Historical Background

As part of the 1996 Legislative session, DFO was created for the purpose of centralizing the statewide fleet responsibilities while maintaining the many fleets owned and operated by the State, into the existing central fleet operated by the Department of Administrative Services (DAS). To accomplish this goal the Division was organized into several smaller programs: The Accounting Program, The Information Technology Program, The Procurement/Operations Program, The Fuel Network Program, and The Surplus Property Program. A brief description of each of the programs as well as the newly created Daily Pool/Shuttle Services Program with their recent accomplishments will be included in this report.

DFO began operating as a Division in 1997, with approximately 1,800 State-owned vehicles under its management responsibility. The Division currently maintains more than 4,500 vehicles with only small growth in the number of Full Time Employees (FTE) it employees. At this time only four FTE positions have been added to the Division (one from Publishing Services and three from the Department of Public Safety). This growth in the number of vehicles managed by DFO without significant staff increases is possible due to the innovative computer programs created by the Division's Administration/IT team, creative alliances with private businesses and the hard work, dedication and willingness of employees within the Division to learn, retrain, reeducate and even change positions to make DFO run more effectively.

As part of the continued evolution of DFO, several functions have been outsourced to a private vendor. These functions include: vehicle cleaning, new vehicle preparation services, towing services, body repair services, surplus vehicle sales, fueling services, engineering services, IT services, emergency maintenance services as well as maintenance and repair of State-owned vehicles.

Consolidation of the State's fleet assets has created a substantial reduction in overhead cost for the State. Prior to the consolidation, overhead cost were approximately \$61 per vehicle, per month. Since the consolidation overhead costs have fallen to about \$54 per vehicle, per month, with a reduction of \$34, more, per vehicle, per month anticipated during Fiscal Year 2002.

State of Utah

Division of Fleet Operations

“ Moving in the Right Direction!”

Vision

“To be considered the most efficient organization...”

Mission

“Provide excellent service, maximum efficiency, and customer fulfillment.”

Values

“Our actions and our decision making reflect these values...”

Customer Service:

“Customers are the very reason for our existence. Customer satisfaction is the measurement in which we gauge our success. We meet our commitments and we are proactive.”

Excellence:

*“We strive for excellence in all aspects of the services we generate. Anything less is unacceptable. We deliver our product on time, meeting all deadlines and on budget.
We provide the best value for the state’s dollars.”*

Character:

“Each one of us is an example to those around us and we conduct ourselves ethically in all situations. Acting as stewards of the tax payer we make decisions in their best interest, always with honesty and integrity.”

Visionary:

*“We are forward thinking and innovative. We embrace change in this evolving world of technology and respond in kind to our customer’s needs.
We seek efficient partnerships with others.”*

Cooperation:

“We realize that we are only as strong as our employees. Thus, we acknowledge that our employees are our most important and vital resource. We commit to invest in each employee’s success. The success of the individual enhances the success of the team. Working as a team fosters the spirit of cooperation.”

Communication:

*“We openly and clearly communicate with all those whom we come in contact.
We are committed to each others success. We recognize diversity of thought and deed and embrace these ideals in our decisions.”*

Environment:

“We acknowledge our commitment to the environment around us and strive to preserve it for the future. Further we commit to making the work place safe and productive.”

Accountability:

“We commit to taking responsibility to resolve the customer’s problem and to communicate back to them the resolution of the issue. We believe that it is unacceptable to convey to the customer statements like, “Its not my job!” Customer service is everyone’s first priority.”

Objectives for FY 2001

Continue to reduce monthly overhead costs of vehicles.

- Analyze the use of vehicles in depth and recapture all recall and warranty related charges to reduce overall fleet expenditures.
- Analyze all internal procedures and streamline the existing processes to maximize efficiency.

Continue to create a Statewide Reservations Network to provide maximum utilization of State-owned vehicles.

- Analyze and approach State Agencies located in areas with large monthly lease requirements, and continued low utilization, to discuss the possibility of opening an agency run Mini-Motor Pool. Mini-Motor Pools are always available for use by all State employees in or traveling to the area, thus providing greater utilization of State-owned vehicles and deferred personnel costs for the agency.

Utilize the cost-per-mile and exceptions reports to identify problems.

- These reports detail our goal to create an exception reporting system that identifies the fleet exceptions in a number of different reporting categories. This report will identify the top 12 problems, and will be called the “Dirty Dozen Report.”

Reorganize the Accounting Program to make better use of the Division’s allotted FTE’s.

- Consolidations of the Fuel and Surplus accounting duties under one managing accountant.
- When the consolidation of a position mentioned above takes place DFO will hire, or reorganize accounting functions, to employ an accountant that will focus on the budget and rate aspects of the program rather than traditional accounting duties.

Launch a Statewide marketing project designed to increase the amount of alternative fuels used by State employees driving State owned vehicles. The marketing project will primarily focus on the use of Compressed Natural Gas (CNG) in the following ways:

- A \$0.2 cent per gallon rebate will continue to be given to agencies that choose use CNG over traditional gasoline fuel products when refueling.
- Division sponsored “Ride n’ Drive” days will continue throughout the State. This program will give State employees a chance to learn more about CNG vehicles and hopefully becoming less fearful of using them.
- Informative articles will be Published in State Newsletters as well as local papers explaining the benefits of choosing an alternate fuel vehicle (AFV) over traditional vehicles.
- DFO will participate in educational seminars throughout the State showing the ease of fueling an AFV.
- Continued participation with the Clean Cities Coalition.

- **DFO will publish brochures explaining the Federal mandates governing the purchase and use of AFV's by government entities, as well as stating the importance of lessening the U.S. dependence on foreign oil.**
- **Expanded events during Alternative Fuel Week in February 2001.**
- **DFO will provide certificates to agencies with the highest increases in alternative fuel use at the end of the Fiscal Year.**

Expand the customer base of the Surplus Property Program.

- **Surplus plans to make property available for sale over the Internet during the coming year.**

Partner with the Salt Lake Olympic Organizing Committee (SLOC) in the following areas:

- **Provide the opportunity for Olympic vehicles to have access to the State Fuel Network.**
- **Offer seminars on the use of AFV's to Olympic volunteers. This will enable more Olympic vehicles to run on the cleaner Compressed Natural Gas (CNG) fuel.**
- **Offer State and Federal Surplus Property to Olympic venues at a reduced cost.**
- **Possibly purchase CNG vehicles to be used during the Olympic for use as State vehicles in 2002.**

Investigate the use of a Global Positioning System (GPS) in State-owned vehicles to assist in:

- **The verification of misconduct of persons operating a State-owned vehicle.**
- **Locating misplaced or stolen State-owned vehicles.**
- **Enabling DFO to locate a lost employee and offer directions.**

DFO Organizational Chart

Programs

The Administration Program

This program oversees the day to day operations of the Division. Highlights of the program are as follows:

- **Marketing.** DFO publishes a monthly newsletter, *State of the Fleet*, via the Internet. The newsletter includes information on achievements of the different DFO programs, award announcements, vehicle safety information and general information on the happenings within the Division. The Division supplies freelance articles about the innovative programs and activities of DFO to various fleet related magazines. DFO also creates informative signs for placement on the State employee courtesy shuttle vans, designed to create a positive public image of the Division and it's programs.
- **Database Integrity.** This is an important element in the management of the State's fleet. The Administration Program oversees the data collection process to insure the highest standards are being met.
- **Computer Program Training.** All computer training by the Division is provided by DFO employee Angie Watson, who has created training manuals for the computer programs used by Division customers and employees. Training classes are held at the State Office Building and throughout the State for Agencies unable to make the trip to Salt Lake City. Angie Watson also answers calls for people who are having problems with one of the software programs used by Division customers and employees. Ms. Watson was recently named as runner up for State Trainer of the Year.
- **Administrative Rules, Internal Policies and Procedures.** The Administration Program is tasked with creating both sets of guidelines governing processes within DFO.
- **Management Analysts.** The Division recently hired two analysts to insure the State is getting the most for it's money in relation to purchases, maintenance, utilization and resale value of State-owned vehicles.
- **Incentive Awards.** The Administration Program has appointed an Incentive Committee to review the Incentive Award nominations of Division employees by their peers. Awards are given in "Recognition" of a good job, for going the "Extra Mile" as well as for "Team Efforts". The awards are distributed monthly and are always covered in the Division Newsletter.
- **Clean Cities Coalition.** DFO is a participating member of the Salt Lake Chapter of the Clean Cities Coalition. This involvement has assisted the Division in building a strong CNG fueling infrastructure throughout the State and enabled DFO to receive several prestigious awards and federal grants.
- **Honda Award.** The Division of Fleet Operation was the proud recipient of the 2000 Honda Award, given for exceptional efforts by a fleet to purchase, use and maintain alternative fuel vehicles.

The Accounting Program

The Accounting Program oversees the financial stability of the other programs within the Division by providing the following services:

- **Overseeing the budget.**
- **Setting lease rates for daily and monthly leased vehicles.**
- **Providing financial reports.**
- **Providing accounts payable and accounts receivable responsibilities.**

The Information Technologies (IT) Program

This team of highly skilled, innovative employees have made DFO a leader among State fleets nationwide because of their skills in program development. Their principle duties and recent accomplishments include:

- **Creating and designing the Division's Web-site.**
- **Maintaining all of the Division's computers, laptops, and printers.**
- **Providing customers with on-line access to accidents forms, State vehicle operator complaint forms, surplus property "want-lists," and fleet tracking program downloads for fueling site locations.**
- **Creating the Computerized Automotive Resource System (CARS) used to generate fleet benchmark reports. CARS also has the ability to interface with the FINET accounting system used by the State.**
- **Creating the Property Listing Utilization System (PLUS) used to track surplus property inventory and sales.**
- **Creating a cost comparison program used to evaluate the cost effectiveness of using a fleet vehicle rather than personal vehicles or a rental from a private company.**

Daily Motor Pool/Shuttle Operations Program

The DFO Daily Motor Pool/Shuttle Operations program is responsible to provide vehicle rental services at motor pool locations in Salt Lake and Weber County as well as shuttle transportation services from the Capital to the other major State office locations in Salt Lake City. The expanded services of this program include the following:

- Added stops on the Capitol Shuttle route to provide State employees access to the new TRAX commuter rail service.
- A new South Valley Shuttle Service that provides transportation to and from the Sandy TRAX stop and the State offices located in the Sandy/Draper area.
- Comment forms available in all shuttles to encourage riders to keep DFO informed concerning riders needs, concerns and what riders think of the shuttle drivers customer service skills, timeliness and driving ability.
- Several Mini-Motor Pools have been opened at State offices throughout the Wasatch Front area after the closure of the North Temple main motor pool location. DFO's goal is to bring the vehicles to the customer. Within the next few years DFO plans to open several more Mini-Motor Pools at offices throughout the State for customer convenience. Mini-Motor Pools decrease the amount of vehicles required for agencies to conduct State business, thus lessening the procurement burden of tax payers.

Daily rental vehicles are provided through the Mini-Motor Pools. Generally, the Mini-Motor Pools maintain a large enough fleet of vehicles to fulfill the needs of State employees. However, during periods of high vehicle demand DFO has implemented two programs to insure State employees the use of a vehicle.

1. The placement of most of the Mini-Motor Pools has been in buildings located along the Capitol Shuttle run. This allows reservations to be made where vehicles are available while providing convenient transportation to and from the motor pool locations. See Attachment 2 for the most recent shuttle schedules.
2. During times of extreme vehicle demand or in the event a special vehicle type, not normally offered through the Mini-motor Pool is needed, DFO has partnered with the Enterprise Rent-A-Car Company to provide rental vehicles for it's customers. DFO is currently the only vehicle rental agency in the state that will use vehicles from a "competitor" to fulfill their daily customer needs.

Two changes were made in the Shuttle Services offered through DFO during FY 2000, to provide shuttle riders with the best possible services.

1. DFO turned the Courts Shuttle Services over to the Courts Administration to maintain and schedule.
2. DFO now provides shuttle schedules in brail to better serve State employees with impaired vision. Shuttle schedules are also available on the DFO web-site, at any of the Mini-Motor Pools and at the information desk of most State offices.

The Procurement/Operations Program

The name of this program is deceiving in its simplicity. While it is true that this program purchases vehicles for the State of Utah, it also oversees many other aspects of the State fleet, including:

- Approving and providing quality control of vehicle maintenance and repair from vendors.
- Managing the yearly vehicle licencing and safety inspection process. DFO has created an alliance with vehicle vendors to provide licence plate installations before delivery.
- Coordinating with Risk Management on accidents involving State-owned vehicles. DFO coordinates all accident repair needs and is the first contact after an accident occurs.
- Coordinating the installation of equipment required for vehicles purchased for Public Safety. DFO will be providing this service to the Tax Commission and will offer this service to all Agencies in the near future.
- Maintaining a State-owned vehicle list and replacement cycle. Once a year during the procurement cycle the Procurement Manager contacts State Agencies with a list of vehicles scheduled for replacement. Agencies are asked for input and the Procurement Manager coordinates the vehicle exchange, and prepares replaced vehicles for sale through the Surplus Property Program.
- Providing emergency roadside assistance to State employees conducting State business in State-owned vehicles.

Over the past year DFO has been running a pilot program with a company called Automotive Resource International (ARI) for purpose of evaluating the costs of tracking and approving the preventative maintenance and repairs of State vehicles. The pilot program helped DFO determine that using a private vendor for these functions of fleet management was more cost effective for the State and increased the level of service DFO can provide to its customers. The transition to the new program with ARI will begin in March 2001. Those vehicles in the State not managed by DFO will continue to receive repair and preventative maintenance through their current programs. All repairs and PM's on vehicles in the ARI program must be approved by following the procedure.

1. The State employee calls the 1-800 number for ARI listed in the State vehicle packet.
2. The ARI Service Writer on the other end of the phone is provided with the current location of the vehicle, the number assigned to the vehicle, licences plate number and a detailed description of the vehicle problem.
3. The Service Writer with ARI then tells the driver the nearest location to take the vehicle for repairs. The Service Writer will contact the repair location to verify the work that is being preformed and to arrange for payment.
4. In the event the driver is stranded with a vehicle that cannot be driven the Service Writer with ARI will make arrangements for a tow-truck to take the vehicle to the nearest shop for repair.

The Fuel Network Program

The Fuel Network is a leader among programs of this kind. By bringing together the State, county, and city governments (as well as the private sector) the fuel network is able to offer its members a nationwide fueling infrastructure. Accomplishments of this innovative program include:

- Winner of the National Association of Chief Administrators (NASCA) year 2000 Outstanding Program Awards for Creative Excellence in Public/Private Partnerships.
- The replacement or removal of 414 old Underground Fuel Storage Tanks (UST) and the complete closure of several fueling sites maintained by different government entities located in the same general area. This curbs waste and helps to protect Utah's precious groundwater supply.
- The fuel network program has set the standard nationwide through its efforts to consolidate fuel efficiencies between several different competing municipal government entities. Each of these entities in the State Fuel Network is now working together in a cooperative effort to make bulk quantity fuel purchases. This effort has grown to 16 million gallons of fuel annually. The related saving equates to approximately .10 cents per gallon or \$1.6 million annually in fuel costs savings. This effort has also significantly reduced the number of state-owned fuel sites by partnering with private retail fuel vendors.
- Continuous growth in access to compressed natural gas (CNG) fueling sites. The Network received \$93,000 in federal grant monies to assist in the construction of three new CNG fueling sites during FY 2000. The sites are located at Utah State University and at the Alpine and Jordan School district offices. Building CNG fueling stations near schools is enabling both Utah State University and the school districts to purchase more CNG school busses, which will greatly reduce the amount of pollution Utah citizens in those communities breath each day.
- Continued membership and support of the Salt Lake Chapter of the Clean Cities Coalition.
- Gascard fueling cards that are accepted nationwide for fuel, maintenance and vehicles repairs.

The Fuel Network provided fueling card (Gascard) is to be used when driving State-owned vehicles. A list of fueling station locations, both private and public, is located in the glove box of each vehicle. The following are the required steps for obtaining fuel with the State provided fueling card equipped with an automatic reader.

1. Place the fueling card into the slot on reader.
2. Enter correct odometer reading. (Whole numbers only, tenths of a mile are not understood by the reader.)
3. Press enter.
4. Enter assigned PIN.
5. Press enter.
6. Enter pump number.
7. Press enter.
8. When you have completed fueling replace nozzle and wait for receipt.

The following steps are required when obtaining fuel from a "Point of Sale" location.

1. Give the fueling card to the attendant at the fueling station for authorization.
2. Follow steps 2-7 in the list above.
3. Retrieve fueling card for attendant and sign receipt.

For more information about fueling a vehicles please visit our Fuel Network Web-site at [http://www.das.state.ut.us/Services/Fuel Network/body fuel network.html](http://www.das.state.ut.us/Services/Fuel_Network/body_fuel_network.html). Choose the "View the State Fuel Network Training Video".

The following steps are required when obtaining fuel for CNG vehicles:

1. Follow the authorization steps listed above.
2. Remove fueling nozzle from dispenser.
3. Connect nozzle to vehicle (listen for an audible click to insure the nozzle is connected securely).
4. Slide fueling card through payment machine to receive payment authorization.
5. Move lever on dispenser to the "ON" position.
6. Turn filler valve on slowly.
7. When fill stops, move the dispenser to the "OFF" position.
8. Turn valve to "VENT" position.
9. Return fueling nozzle to dispenser.

The Surplus Property Program

The Surplus Property Program operates as an investment recovery program for the State of Utah. Several changes have been made to this program during the past year including:

- Working with the company eutah to create an on-line shopping center featuring State items which have been surplused. It is anticipated that the on-line shopping center will be operational within the next few months.
- Awarding a contract to an auction house to regularly sale and auction State-owned vehicles which have reached either six-years of age or 90,000 miles. Prior to the contract award Surplus participated in two vehicle auction pilot programs during FY2000 to determine if the use of a private auction would better serve the State vehicle sales needs. The auction of other surplused State items is being considered at this time.
- The use of a federal surplus property "want-list" recently implemented at Surplus Property enables federal property screeners to locate needed items rather than warehousing items for possible need in the future. The "want-list" form can be completed and e-mailed on-line as well as in the traditional paper form. This program has reduced the number of federal auctions needed in FY 2001.
- Federal screeners were able to locate significant amounts of fire foam for use in the many wildfires experienced in the State during FY 2001.
- Implementation of the PLUS software program used to track Federal and State Surplus inventory, billing, customer information, Federal compliance, invoicing, receiving and "want list" requests.

Attachments 1-22

Attachment 1

Statistical and Budget Information

The following two pages make a comparison between Fiscal Year 1999 and 2000 in regards to important Statistical and Budget Information in the management of the State fleet and Surplus Property.

Attachment 2

Current Shuttle Schedule

The following three pages are the current shuttle schedules that run out of the Capital and Draper sites.

Attachment 3

Vehicles by Department in Fiscal Year 2000

This snapshot of the fleet was taken on the last day of the Fiscal Year, June 30, 2000. Transportation is the Department with the most vehicles (1,893), followed by Natural Resources (764), Public Safety (705), Utah State University (603), and the University of Utah (503).

Vehicles Reported to the Legislature by Year

The bar chart shows a six year history of vehicle counts. Increases in the vehicle count are accounted for in authorized expansions of the fleet, and changes in how DFO defined a vehicle to be counted in the report.

Average Miles Per Vehicle Per Year

The average miles that each vehicle in the State fleet travels each year remained flat from Fiscal Years 1993 to 1997. It dipped down slightly in Fiscal Year 1998 and has been steadily going up during the last two Fiscal Years. DFO continually monitors the utilization of vehicles in the State fleet to help agencies identify vehicles that are under utilized and what locations make sense to have mini motor pools instead of monthly lease vehicles to individuals.

Attachment 4

Percentages of Light Duty Vehicles in Fiscal Year 2000

The pie chart shows a breakdown of the types of light duty vehicles in the state fleet on the last day of Fiscal Year 2000. Sedans make of the largest percentage with 31%. The next largest category are Vans at 18%, followed by 4X2 Trucks at 17%, 4X4 Trucks at 12%, and Patrol Vehicles at 9%.

Attachment 5

Percentages of Heavy Duty Vehicles in Fiscal Year 2000

The pie chart shows a breakdown of the types of heavy duty vehicles in the State fleet on the last day of Fiscal Year 2000. The top two vehicle types in the heavy duty category are 1 Ton 4X2 Trucks (54%), and Tractors, Loaders, Construction vehicles (28%).

Attachment 6

Percentages of Light Duty Manufacturers in Fiscal Year 2000

The pie chart shows a breakdown of the types of light duty manufacturers in the State fleet on the last day of Fiscal Year 2000. Ford is the manufacturer with the largest percentage with 41%. Chevrolet makes up 28% of the light duty fleet, Dodge is third with 13%, GMC (8%) and Oldsmobile (3%) round out the top five manufacturers.

Attachment 7

Percentages of Heavy Duty Manufacturers in Fiscal Year 2000

The pie chart shows a breakdown of the types of heavy duty manufactures in the State fleet on the last day of the Fiscal Year. International is the manufacturer with the largest percentage with 19%. Ford is a close second with 17%. White GMC was third with 14%.

Attachment 8

Distribution of Marked and Unmarked Vehicles in Fiscal Year 2000

The pie chart shows that 90% of all the vehicles in the State Fleet are marked with the State Seal. 10% of vehicles are unmarked and are used to conduct State business in a way that protects the identity of the State employee in dangerous situations.

Four Year History of Marked and Unmarked Vehicles

The four year history shows that the percentage of unmarked vehicles in the fleet is going down. In Fiscal Year 1997 unmarked vehicles represented 17% of the State fleet. At the end of both Fiscal Years 1999 and 2000 that percentage has dropped to 10%.

Attachment 9

Vehicles put in service by Month in Fiscal Year 2000

In Fiscal Year 2000 there were 834 total vehicles put into service. May and June were the months with highest number of vehicles put in service with 200 in May and 166 in June. The average number of vehicles put in service per month during the Fiscal Year was 70.

Attachment 10

Vehicles Retired by month in Fiscal Year 2000

In Fiscal Year 2000 there were 913 total vehicles retired. July and June were the months with the highest number of vehicles retired, both had 114 vehicles. On average the number of vehicles retired per month during the Fiscal Year was 76.

Attachment 11

Accidents by Department in Fiscal Year 2000

In Fiscal Year 2000 there were 706 total vehicles in an accident. These accidents involved 48 different State Agencies. Public Safety had the most accidents with 223. UDOT was second with 85 accidents. Human Services with 81, Corrections with 76, and the Administrative Services Daily Pool with 48, round out the top five agencies with the most accidents.

Accidents Per Year by Vehicles that DFO Manages

The number of accidents by the vehicles that DFO manages over the past three years has more than doubled. A large portion of that increase is due to the consolidation of Public Safety into DFO. As mentioned above Public Safety accounted for almost a third of all the accidents during the Fiscal Year.

Miles Between Accidents

The average number of miles between accidents has gone up and down over the past three years. Fiscal year 1999 and 2000 had roughly the same mileage but consolidation of Public Safety in Fiscal Year 2000 caused the number of accidents by vehicles that DFO manages to increase significantly. DFO is making an effort to reduce the number of accidents by employees driving State vehicles by: implementing and Accident Review Board that will help identify high risk drivers, requiring a defensive driver training class to be taken every two years by State employees, and inspecting the daily motor pool vehicle between each rental to insure the vehicle can operate safely.

Attachment 12

Accidents by Month in Fiscal Year 2000

The 706 accidents that happened in Fiscal Year 2000 were spread fairly evenly between the months of the year. On average there were 58 accidents per month with March as the peak month at 75 accidents.

Attachment 13

Motor Pool Reservation Percentages by State Agency during Fiscal Year 2000

Human Services is the State Agency that used the motor pool centers around the State the most often. Out of more than 30,000 reservations Human Services used 21% of them. The School for the Deaf and Blind used the pools second most often with 13% of all reservations.

Attachment 14

Percent of Total Reservations by Motor Pool Location During Fiscal Year 2000

The main motor pool on North Temple in Salt Lake City was the location where most of the daily pool vehicles were taken from in Fiscal Year with 12% of all reservations. That location is now closed down and the vehicles dispersed to other motor pools to provide vehicles at the actual locations where State employees work. Utah State University was the next busiest motor pool in the State during the Fiscal Year with 11% of all reservations.

Attachment 15

Percent of Total Reservations at Motor Pool Locations by Vehicle Type during Fiscal Year 2000

Sedans make up the largest portion of the reservations at motor pool locations with 64%. Vans also make up a significant portion of motor pool reservations with 31%.

Attachment 16

Percentages of Vehicle Types at State Motor Pools in Fiscal Year 2000

The two largest categories of vehicle types in the daily motor pools are Sedans with 54% and Vans with 35%.

Attachment 17

Annual Shuttle Passengers

The bar charts shows that the number of passengers using the shuttle services offered by DFO is going down. The decrease in ridership on the shuttles is a direct result of the court shuttles being turned over the Counts Administration management. In addition, DFO shuttle drivers have noted the novelty of riding TRAX (and then taking the shuttle to the Capital) has worn off for some previously regular shuttle riders which has caused a decrease in ridership.

Attachment 18

Agencies with Alternate Fuel Vehicles

The attached bar chart shows which agencies had alternate fuel vehicles on the last day of the Fiscal Year. Human Services had the most AFV's with 133. The next closest agency is the Administrative Services Daily pool with 70. Most of the Departments or agencies in the State fleet typically have between 1 and 3 AFV's in their vehicle make-up.

Attachment 19

Top Twenty Vendors Used to Repair and Maintain Fleet Vehicles in Fiscal Year 2000

The State uses hundreds of different private vendors to repair and maintain its vehicles. During Fiscal Year 2000 Gascard was the vendor with the highest dollar amount paid out at \$342,029. Safelite Glass was second on the list of dollars paid to outside vendors at \$223,871. The table shows a three year history of the 10 ten vendors used to repair and maintain vehicles.

Attachment 20

Percent of Total Repairs and Preventative Maintenance by Category in Fiscal Year 2000

The attached bar chart shows what types of repairs and preventative maintenance categories are used most often in the maintenance of State vehicles. Gascard Transactions which are typically used for oil changes and car washes represent almost a third of all the work completed on vehicles in the State fleet.

Attachment 21

Number of Vehicles Sold Annually

The attached bar chart shows an upward trend in the number of State fleet vehicles sold each year. The trend can be accounted for in the following ways: DFO has privatized the sale of its vehicles with TNT Auction which has streamlined the sales process, DFO created an improved replacement program that pushed many of the State's older vehicles to be sold, and DFO's monthly lease rate is forcing agencies to be more fiscally responsible with their vehicles. If Agencies are not fully utilizing their vehicles the monthly rate being assessed to the vehicle motivates them to reconsider how important it is to keep the vehicle. Many agencies are choosing to turn in underutilized vehicles for sale to avoid the monthly lease rate payment which drives the trend of increased vehicles sales up.

Attachment 22

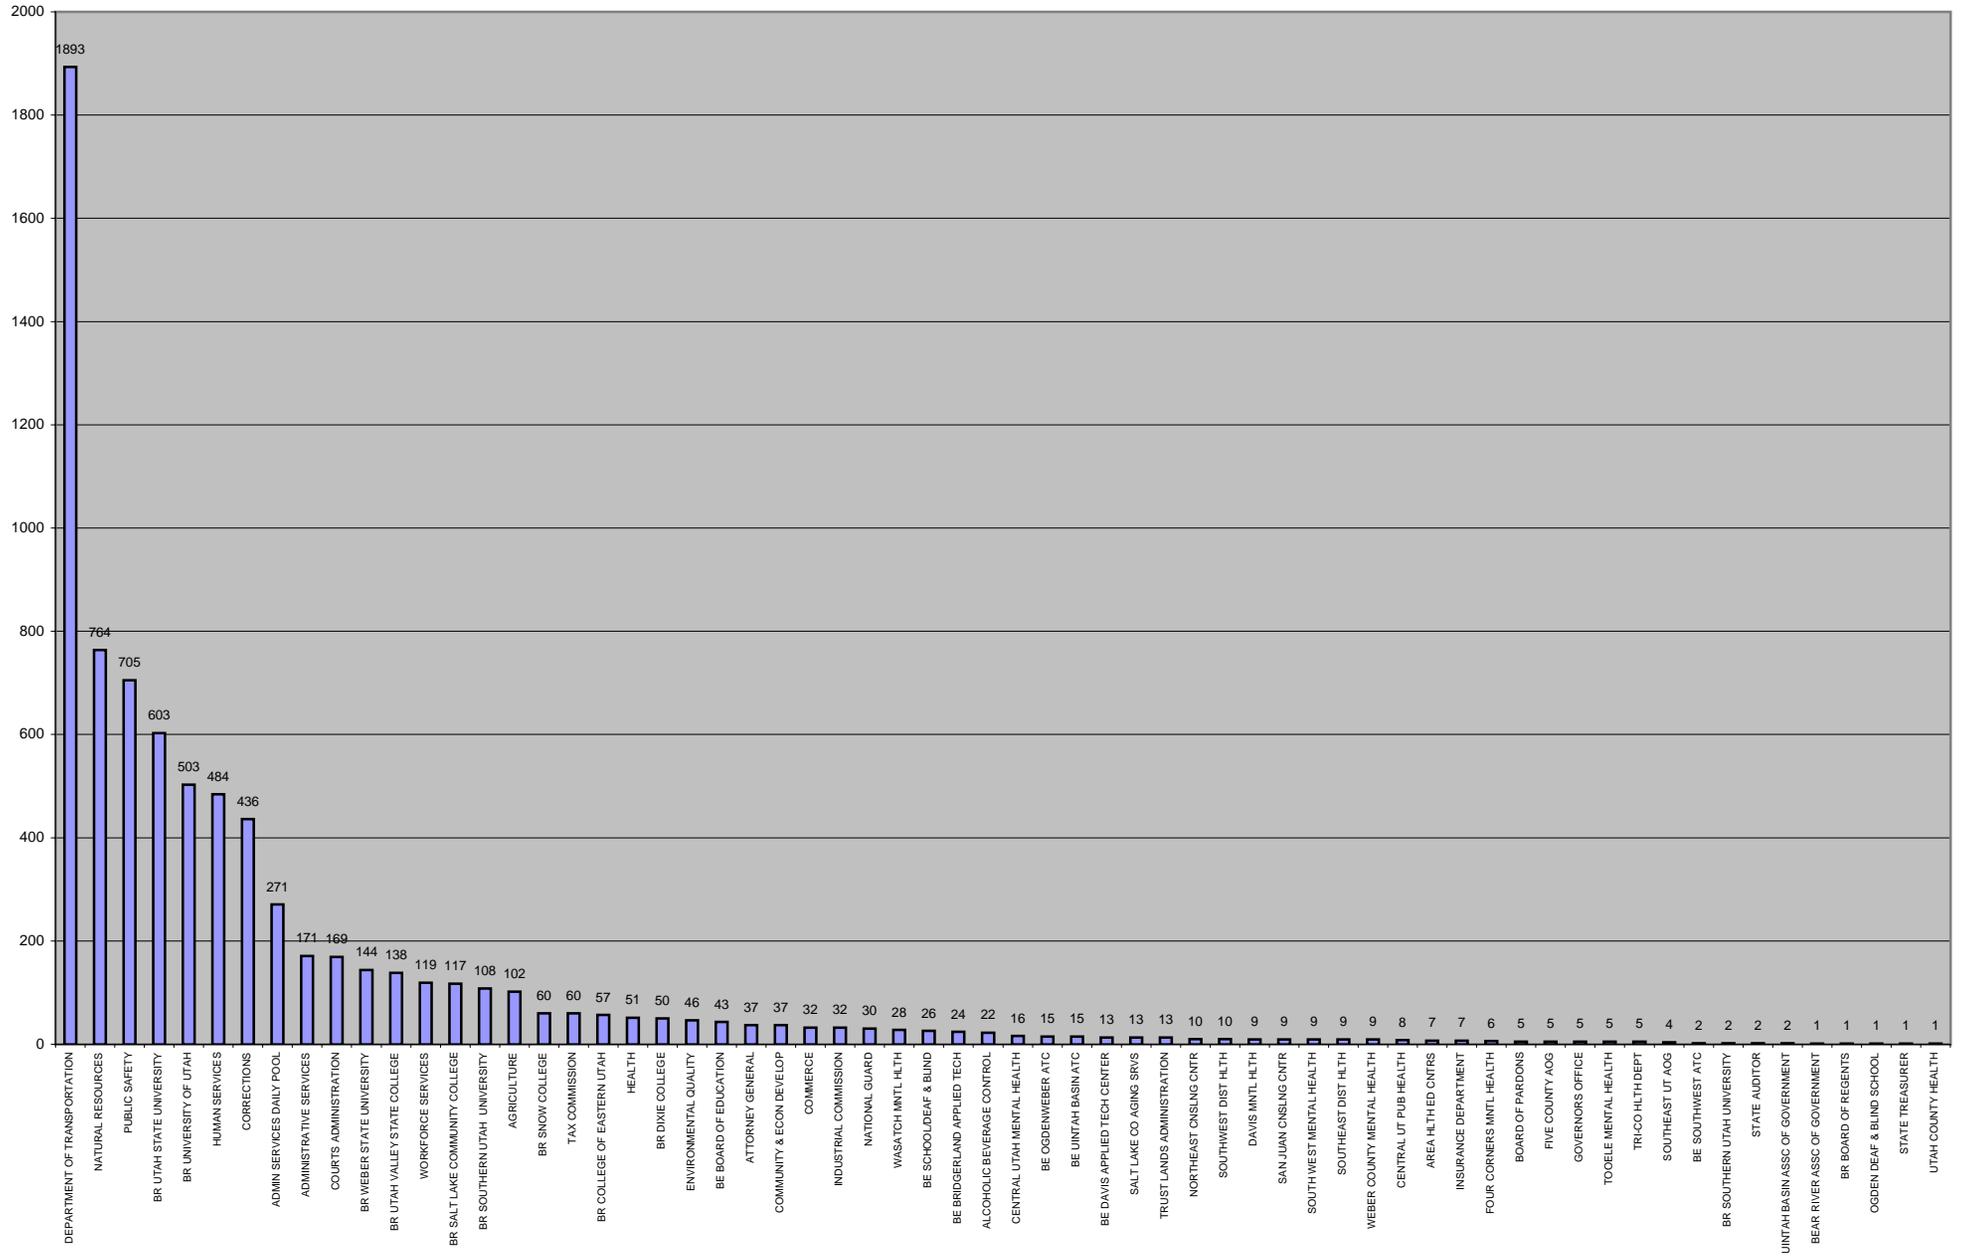

Sample “Dirty Dozen Report”

Attached is a sample “Dirty Dozen Report” that DFO runs monthly. The report pulls the vehicles with the highest cost per mile period to date. The strategy behind the report is to find the most blatant errors in the data system so that corrections can be made before month end billing.
